OPTIONS

Nicol Thomas has worked closely with the Parish Council to develop a scheme which consists of 10x 2 bedroom bungalows 8 x 1 bedroom bungalows and 6 x 2 bedroom houses. This vast variety of residential units is purposed to serve the community's different residential needs. The scheme also includes two wellbeing green spaces where the residents can meet and interact with one another and enjoy the diverse green spaces.

96 parking spaces will be allocated to the existing residents and 34 parking spaces to the new proposal this move will not only give better parking spaces to Regents Street but increase value to their property. The new access road will allow bin collection for the proposal along with giving access to the rear of Regent St properties.

The design aim for the admin block is to create a modern appearance which the locals can take great pride in and appreciate the architecture rather than designing to normality.
